## MRAPS Draft Scoping Summary Report Available Online

**Omaha, Neb.** – The U.S. Army Corps of Engineers has announced the release of the Draft Scoping Summary Report for the Missouri River Authorized Purposes Study (MRAPS). The Corps is hosting seven public feedback meetings to facilitate communication and feedback pertaining to the draft report. “The purpose of the feedback meetings is to provide a forum in which the public can offer their thoughts on the draft scoping summary report. **BACKGROUND:** Congress directed the Corps to conduct a study of the Missouri River projects within the basin to review the original project purposes based on the 1944 Flood Control Act to determine if changes to these purposes are warranted. The eight originally authorized purposes are flood control, hydropower, water supply, irrigation, navigation, recreation, water quality, and fish and wildlife. Infrastructure operated by both the Corps and Bureau of Reclamation is included in the study.
